Precipitation probability					
<05%	<05%	30%	60%	60%	60%

Forecast for Monday 29 Nov 2021

Weather: A dry, bright and frosty start to Monday morning but increasing cloud during the morning, as milder air starts to push in from the west during the afternoon. It will become quite dull by early afternoon with light rain or sleet, increasingly turning to rain as the milder air makes its way across the Yorkshire Dales. Precipitation will mainly be light and patchy with a few drier spells during the evening and stronger winds.

Chance of cloud free mountain/hill tops above 600m: 90% in the morning but reducing to 20% by the evening as patchy low cloud becomes more broken and spreads east across the area during the late afternoon.

Visibility: Good visibility through much of the day, however it will turn cloudier and duller through the afternoon especially in the west as cloud becomes increasingly thick above around 400-500m. Visibility will become poor in any sleet but will moderate as it turns to rain later in the evening.

Forecast for Tuesday 30 Nov 2021

Weather: A dull and cloudy morning with outbreaks of light and patchy rain or drizzle at times. A few brighter spells may be possible in the east. Rain will intensify in the evening with some heavier periods accompanied by strong winds it won't be very pleasant at times on the Dales.

Maximum wind: West or southwesterly 30mph gusting 35-45mph

Chance of cloud free mountain/hill tops above 600m: 20-30%, expected to be quite cloudy to low level associated with persistent rain and drizzle. Perhaps a few brighter periods in the afternoon in the east.

Visibility: Moderate or poor for most of the day in light rain or drizzle and then heavier rain later. Cloud bases will be broken from around 400-500m for much of the day.

Temperature: **Valleys:** Plus 10 Celsius.
At 600m: Plus 5 Celsius.
Freezing level: Above the summits.
